ABOUT ME

I'm a dynamic and multi-skilled tech creative with a passion for building digital solutions and visual content. With hands-on experience in web development, networking, and video production, I bridge the gap between technology and creativity. Currently pursuing a Diploma in ICT, I specialize in crafting websites, editing videos, and creating animations that tell compelling stories. I'm driven by innovation, problem-solving, and a commitment to quality in everything I do.

WORK EXPERIENCE

- Freelance tech repair & client support (self-employed)
- Designing posters and flyers for clients.
- Made an online tool that enables one to WhatsApp-text others without saving their contact, by just entering the recipients' phone number made by HTML, CSS and JavaScript. The tool is named "InstantPing"
- I produced animation-based promotional videos for two different companies.
